

## Macintosh Version of Grateful Med Updated

The National Library of Medicine has issued Version 2.1 of Grateful Med for the **Mac**. Several bugs found in the initial release have been corrected.

- ➡ Saving results using Save or Save As will now save the entire reference
- ➡ A large number of references will print without the extra characters and spacing in between
- ➡ The MeSH More Specific Terms display now shows the correct hierarchy of terms
- ➡ Loansome Doc orders will be sent properly
- ➡ The files containing the Medical Subject Headings (MeSH) listings have been updated with 1994 changes
- ➡ The year ranges covered by Medline and its "Older Material" files now have the 1994 structure.

Version 2 users should be sure to read the Readme file for Version 2.1 before deleting Version 2.0. For example, it is important to send all remaining Loansome Doc orders from Version 2.0. Order files can't be transferred from 2.0 to 2.1.

Network Grateful Med users can download the new version from PUBnet. Modem users can bring two

HD formatted disks to the NIH Library, Room 1L21. Copies will be ready within 24–48 hours.

## Health Services & Technology Assessment Information

The National Library of Medicine's R&D component, the Lister Hill Center, recently announced the availability of a new electronic resource for clinicians and health consumers. Called **HSTAT** (Health Services/Technology Assessment Text), it includes full-text clinical

practice guidelines, quick-reference guides for clinicians, and consumer brochures. The Agency for Health Care Policy and Research publications, the NIH consensus development conference and technology assessment reports, and the U.S. Preventive Services Task Force Guide to Clinical

Preventive Services are sources for the information on HSTAT. The Agency for Health Care Policy technology assessment reports will be available later in 1994.

HSTAT is mounted with the NLM's Full-Text Retrieval System which provides a menu-driven interface, a table of contents for each document, and the ability to search by words or phrases. HSTAT is accessible via Telnet at the address **text.nlm.nih.gov**. Log

### The Internet as a medical

**resource** is described in a current issue of JAMA (1994 June 22/29; 271(24):1934-9). It covers access, clients and servers, services, and specifically the medical information available on Internet. Several step-by-step examples are given.

in as **hstat**. A VT100 or VT102 terminal emulation is required.

NIH staff can also access HSTAT through the NIH **Gopher**. Select "about this and other Gophers at NIH," then National Library of Medicine Gopher. HSTAT is presented at this point as a menu choice. **Mosaic** users can find HSTAT through the NLM's home page, "HyperDOC," under "On-Line Information Services."

## Resources for Women Scientists

The NIH Library, in collaboration with the NIH Committee on the Status of Intramural Women Scientists, has dedicated a reference file drawer to information for women in science. The files are located a cabinet on the Upper Level. They contain information on

- ➡ Job and postdoctoral opportunities, including a description of how to search on-line for federal government jobs
- ➡ Grant information and advice on how to write a grant
- ➡ Articles on how to get a job and on mentoring

**See Search Tip on back for hints on searching Grateful Med**

- ➡ Meetings and conferences
- ➡ Other articles relevant to women in science
- ➡ Information on how to deal with sexual harassment and discrimination, and on EEO resources at NIH
- ➡ Association of Women in Science (AWIS) newsletters
- ➡ A National Science Foundation (NSF) book on visiting professorships for women

Clara Pelfrey (496-0518) is responsible for the information in the files. The material may be xeroxed or used in the Library, but cannot be checked out.

## Journal Issues Needed

The Library is seeking donated copies of the following journal issues:

**Alcohol and Alcoholism** Volume 27, Number 1, 1992

**American Journal of Clinical Oncology** Volume 11, Number 5-6, 1988

**Clinical and Experimental Pharmacology and Physiology** Supplement 20, 1992

**European Journal of Clinical Microbiology and Infectious Diseases** Volume 11, Number 9, 1992

**Hepato-Gastroenterology** Volume 39, Number 4, 1992

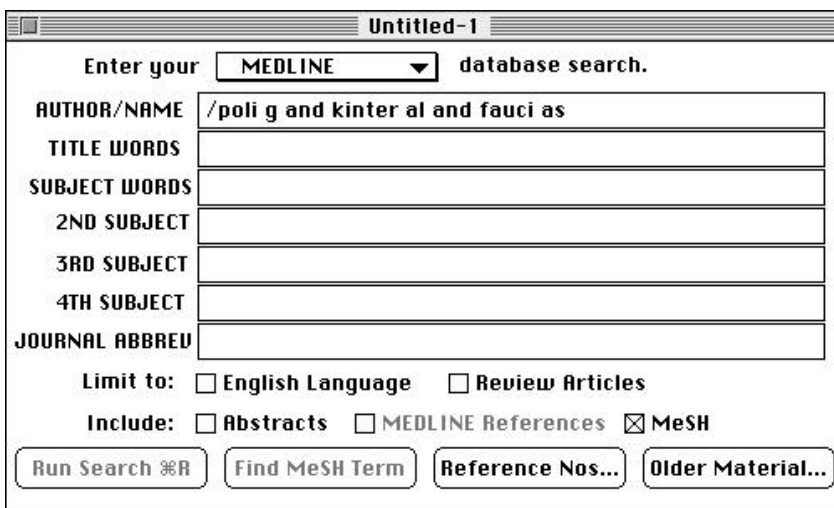

**Journal of General and Applied Microbiology** Volume 38, Number 4, 1992

**Journal of Hypertension** Supplements 4 & 5, 1991

**Journal of Medical Microbiology** Volume 37, Numbers 1 & 2, 1992

## Grateful Med Search Tips

An **author search** through Grateful Med can be modified to include multiple authors by using a forward slash (/)

Enter your **MEDLINE** database search.

**AUTHOR/NAME** /poli g and kinter al and fauci as

**TITLE WORDS**

**SUBJECT WORDS**

**2ND SUBJECT**

**3RD SUBJECT**

**4TH SUBJECT**

**JOURNAL ABBREV**

Limit to: ☐ English Language ☐ Review Articles

Include: ☐ Abstracts ☐ MEDLINE References ☒ MeSH

Run Search **⌘R** Find MeSH Term Reference Nos... Older Material...

- ➡ The names must be formatted in the Medline standard (last name followed by initial(s) without punctuation). If the middle initial is unknown the first initial can be followed by a colon (:), e.g. fauci a:. This is called truncation. The computer will search for all names that begin "fauci a".
- ➡ Logical operators, "and," or "or" must be typed in when a line begins with a forward slash (/).

**Journal of Neuroendocrinology** Volume 4, Number 4, 1992

**Journal of Physiology and Pharmacology** Volume 43, Numbers 3 & 4, 1992; and Volume 42, Numbers 3 & 4, 1991

**Pharmacologist** Volume 34, Number 4, 1992  
**Progress in Cardiology** Volume 4, Number 2, 1991

**Progress in Neurobiology** Volume 39, Number 1, 1992

Please contact Margaret Kunz at 6-3541 about issues or mail them to the attention of Ms. Kunz at the NIH Library, Building 10, Room 1L09G.
